Addis Ababa, Ethiopia

As a computer science and engineering student, I have been developing fully responsive websites using React, a powerful front-end framework. My studies in computer science and engineering have provided me with a strong technical foundation, while my focus on creating engaging user experiences allows me to bring a developer's attention to detail and a holistic understanding of project management to every project I undertake.

## Experience

### Front-End Developer

July 2023 - Sep 2023

#### Oromia International Bank

- As a front-end developer, I specialize in creating fully responsive web applications with a strong focus on user experience. During my internship at Oromia International Bank, I successfully developed a fully responsive website using the Tailwind CSS framework. Working closely with the design team, I ensured that the user interface was engaging, intuitive, and visually appealing. This experience allowed me to sharpen my skills in HTML, CSS, and UI development, enabling me to deliver high-quality solutions that meet user needs.

### Full-Stack Developer

Nov 2022 - Dec 2022

#### Adama Science And Technology University

- As part of my coursework project, I led a team of five members in the development of an Online Examination Test application. I efficiently organized meetings, delegated tasks, and provided assistance to my teammates in debugging. Taking on a full-stack role, I implemented the entire login system, enabling CRUD operations on the user list and user validation. Additionally, I played a key role in designing the overall concept and layout of the website. Throughout the project, I utilized HTML, CSS, Java, and MySQL to bring the application to life.

### Front-End Developer

Jan 2023 - Feb 2023

#### Personal Project

- As part of a personal project, I developed a website that provides comprehensive information about the guitar store. Taking on a Front-End role, I utilized React and Tailwind CSS as the styling framework, to create a dynamic and interactive platform. The website showcases various details about the guitar store, including its home, categories, about, and help.

## Education

### Adama science and technology university

- Bachelor of Computer science and Engineering
- GPA: 3.52/4

## Skills

- UI/UX
- React Js
- JavaScript
- HTML
- CSS
- Python
- MySQL
- Figma
